Three Bazing Stars appeared	30
The last great Plague in <i>London</i>	30
A great Fight between the <i>English</i> and the <i>Dutch</i>	28
The great Fire in <i>London</i> , September 3, 4, 5, 6,	28
The Duke of <i>Albaniarle</i> died	24
The last great Snow 11 days	20
A great Frost containing 10 Weeks, so that the <i>Thames</i> was Frozen over beyond <i>Gravesend</i> ,	10
King <i>Charles</i> II. died Feb. 6,	9
King <i>James</i> II. and Queen <i>Mary</i> Crowned April 23.	9
King <i>William</i> III. and Queen <i>Mary</i> II. Proclaimed February,	4

Since

Days of the Moons Age Increasing.

from the Full to the Change.

being the

A Table shewing at what hour and minute the Moon cometh to the South; and also how long the shineth for every day of her age, &c the several uses of the *same Table*.

**I**N the Fifth Column of this *Almanack*, you have the

Age of the *Moon* standing against every day in the Year, by help whereof and this little *Table*, you may nearly find I. At what hour and minute the Moon will be just in the South, either evening or morning.

II. How many hours and minutes she will *shine*, either at night or next morning.

III. At what time the Moon *riseth* or *settleth*

IV. The *hour* of the *night*, by the *shadow* of the *Moon* upon any *Sun-Dial*.

I. To find at what time the Moon will be due South.

*Example*, Upon the 25 of *March*, the Moon being then 10 days old, I would know at what time the Moon will be upon the *Meridian* or *South*.

Look in the first Column of this Table for 10, the *Moons* Age increasing, and right against it in the second Column, you shall find 8 hours 0 m. at which time the Moon will be just *South* in the even.

II. To find how long the Moon *shineth*.

*Example*, Upon the 21 of *March*, the Moon that day being 6 days old, I would know how many hours and min.

A 2

the *shineth* that night.

The Moon comes to South in the morn.  
The Moon shines in the Morning.  
The Moon comes to South in the morn.  
The Moon shines in the Morning.

Look for 6 (the Moons age) in the first Column of this Table, and right against it in the third Column, you shall find 4 hours 48 min. and so long will the Moon shine that Evening, because the Moon increaseth.

1. If the Moon be increasing, that is, if she be less than 15 days old, add the hours and minutes of her shining, to the hours and minutes of the Sun's Rising, and the sum will be the time of the Moons Rising. But.

2. If the Moon be decreasing, that is, if she be above 15 days old, subtract the hours and minutes of her shining from the hours and minutes of the Sun's Rising, and the remainder will be the time of the Moons Rising.

Example. Upon the 22 of March, the Moon is 7 days old, and the time of her shining is 5 h 36 m. which added to 5 h. 40 m. the time of the Sun's Rising that day, the Sun will be 11 hours 16 min. at which time, that day, the Moon will rise. But upon the 10 of March, the Moon being then 24 days old, the time of her shining is 4 hours 48 min. which subtracted from 6 hours, the Sun's Rising that day, there will remain 1 h. 12 m. in the morning, for the time of her Rising.

1. If the Moon be less than 15 days old, add the time of her shining to the time of the Sun's setting, the sum is her setting. — But.

2. If the Moon be above 15 days old, subtract her shining from the Sun's setting, the remainder is her setting, adding or subtracting 12 hours if need be: — So upon the 18 day of May (the Moon being 4 days old) she will be found to set at 11 h 13 m. at night; and upon the 10 of May (the Moon then being 26 d. old) she will be found to set at 4 h. 38 m. the next day.

Find at what time the Moon comes to the South as before, which known, mark how much the Shadow upon the Dial wants of 12, which take from the time of the Moons coming to the South, the remainder is the hour of the night. But if the Shadow be past 12, add those hours to the coming to the South, and the Sum is the hour of the night.

Example. Upon the 19 of April, the Moon being 13 day old, and comes to the South at 20 h. 24 m. and that night I find the Shadow at 9 h. 30 m. which wants 2 h. and a half of 12; wherefore take 2 h. 30 m. from 20 h. 24 m. and there will remain 17 h. 54 m. for the hour of the night. — But if the Shadow had been 2 h. 30 m. after 12, those added to 20 h. 24 m. would make 22 h. 54 m. for the hour of the night.

**A Table of Interest for several Sums of Money at the rate of 6 in the Hundred, for divers Months and Days, Viz.**

Adver. sent it to the Printer.

It may possibly have fallen out, that in often Printing the Fairs, some Errors may have escaped Correction, which if any Gentleman, Corporation or Town, who are concerned to hold Fairs, shall find out or observe, and thereof give timely Notice in Writing, to Benjamin Toke at Stationers Hall London, the same shall be amended in the next.

The Number of Pounds, Yards, Grofs, or the like, to be bought or fold.

## The Use of the Table of Accounts.

**T**HIS Table will serve for many good purposes, but it is here principally intended for the Chapmans use in Buying or Selling of any Commodity by the Yard, Ell, Pound, Hundred, Gallon, &c. And its use is very easie; as by

### EXAMPLE I.

*At 9 d. the Yard, what will 70 yards come to?*

Look for 9 d. at the head of the Table; and for 70 in the first Row or Column of the same Table, and against 70, and under 9 d. you shall find 2 l. 12 s. 8 d. And so much will 70 Yards at 9 d. the Yard come to.

Also, At 5 d. the Gallon, 500 Gallons will come to 10 l. 8 s. 4 d.

*And so of any other Price, or any other Number.*

But if you cannot find your just Price at the head of the Table, nor your just Number on the side, you must then take it at twice, and adde them together, and the sum shall answer your Question.

### EXAMPLE II.

*At 7 s. the Dozen of Gloves, what will 78 dozen come to?*

	l.	s.
70 Dozen at 7 s. comes to	24	10
8 Dozen at 7 s. comes to	2	16

The Sum      27   06

So that 78 Dozen at 7 s. the Dozen, come to 27 l. 6 s.

### EXAMPLE III.

*At 3 s. 5 d. 3 q. the Ell, what will 300 Ells come to?*

	l.	s.	d.
200 Ells at 3 s. comes to	45	0	0
300 Ells at 5 d. comes to	6	5	0
300 Ells at 3 q. comes to	0	18	9

The Price of 300 Ells      52   3   9

### EXAMPLE IV.

*At 7 d. halspeny the Pound, what will 92 Pound come to?*

	l.	s.	d.
90 Pound at 7 d. the Pound, comes to	2	12	6
2 Pound at 7 d. the Pound, comes to	0	01	2
90 Pound at a halspeny, comes to	0	03	9
2 Pound at a halspeny, comes to	0	00	1

The Price of 92 Pound, at 7 d. 2 q.      2   17   6
